

Ocean[®] Clean^{GmbH}

Water Treatment

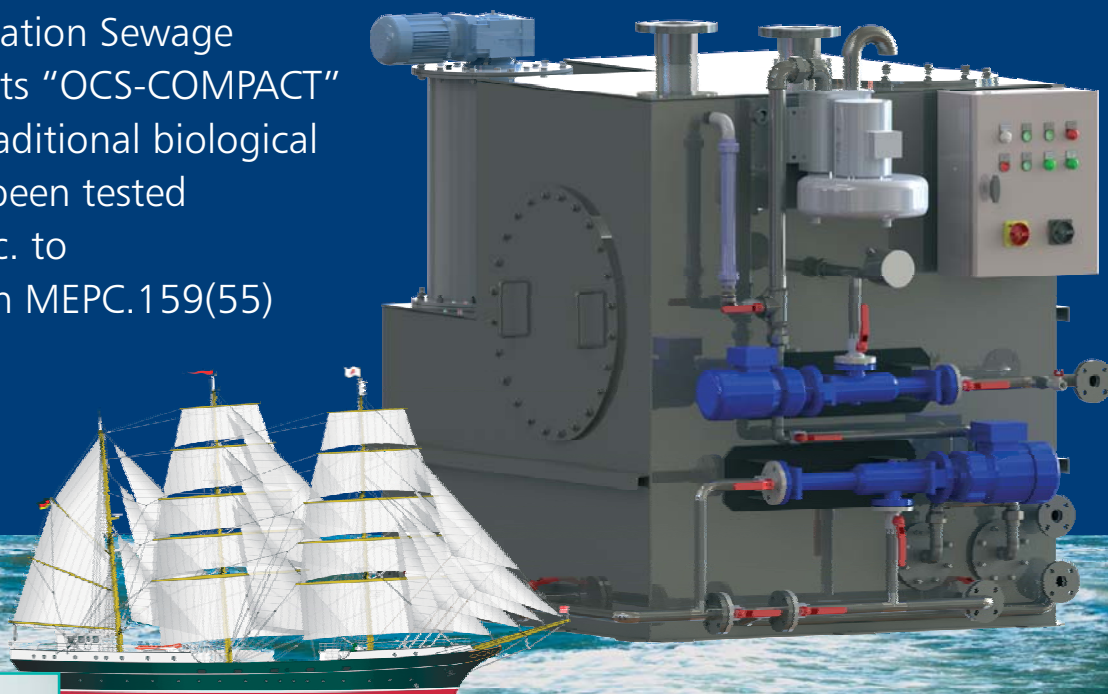

Sewage Treatment System

For Ocean's Sake

The new generation Sewage Treatment Plants "OCS-COMPACT" replaces our traditional biological units and has been tested successfully acc. to IMO-Resolution MEPC.159(55)

The Ocean Clean GmbH supplies the new Alexander von Humboldt

Combi Dock IV

Hermann Marwede

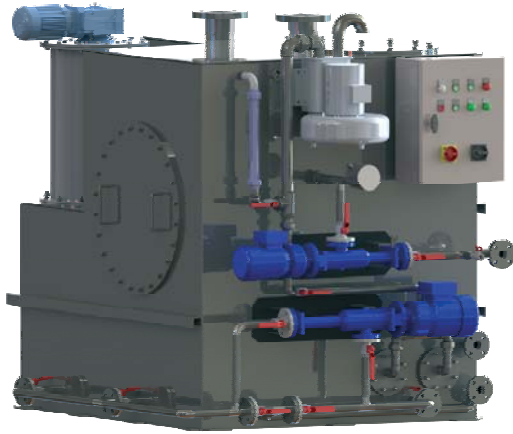

- Available for vacuum or gravity toilet systems
- No dilution, disinfection and dechlorination required
- No continuous chemical consumption
- Easy to operate
- Simple treatment process
- Fully automatic operation
- Made in Germany

Ocean[®] Clean Water Treatment GmbH

Biological Sewage Treatment Plant Type "OCS-COMPACT"

Type tested acc. to IMO-Resolution MEPC.159(55) by "BG Verkehr".

The Biological Sewage Treatment Plant "OCS-COMPACT" is supported by an advanced low pressure membrane system.

It is a complete Ocean Clean in house development and design.

The Advantages

- Available for vacuum or gravity toilet systems
- No dilution, disinfection and dechlorination required
- No continuous chemical consumption
- Easy to operate
- Simple treatment process
- Fully automatic operation
- Clear colourless effluent with following parameters
 - Suspended Solids: < 1 mg/l
 - BOD5: < 2,8 mg/l
 - COD: < 38 mg/l
 - Coliforms: < 1 per 100 ml
- Customized solutions are available on request.

Selection of STP dimensions – other sizes are available on request

Type	Length [mm]	Width [mm]	High [mm]	Weight-Dry [kg]
OCS-compact 10	1794	1489	1638	746,77
OCS-compact 15	1955	1553	1673	826,22
OCS-compact 25	1960	1716	1673	1062,75
OCS-compact 35	2662	1989	2112	1424,41
OCS-compact 55	3911	1999	2112	1967,80
OCS-compact 80	4187	2528	2112	2535,59
